# TIMOFEY FAYZULLIN

PhD student

*Human-Robot Interaction | Assistive Robotics*

## CONTACT

**410-370-3380**

**timofey.fayzullin123@gmail.com**

**Winchester, MA, United States**

**LinkedIn**

## EDUCATION

*UMass Lowell*

**B.S. in Computer Science**
*Focus in Fullstack Development*
2019 - 2023

**M.S. in Computer Science**
*Focus in Human Robot Interaction*
2024 - 2025

**PhD in Computer Science**
*Focus in Human Robot Interaction*
2025 - Present

## SKILLS

- Report Writing
- Data Analysis
- Research Methodologies
- Presentation Skills
- Proficient with Python
- Proficient with Dart
- Proficient with ROS 2
- Proficient with GitHub
- Proficient with Flutter
- Proficient with Figma
- Working Knowledge of C
- Working Knowledge of C++
- Working Knowledge of Java
- Working Knowledge of JavaScript
- Working Knowledge of VirtualBox
- Working Knowledge of Adobe Creative Suite

## PROFILE

Computer Science PhD student and research assistant specializing in human-robot interaction (HRI), voice user interfaces (VUIs) and assistive robotics. Experienced in HRI study design, autonomous robot systems, voice-based interfaces, data analysis, and research communication. Background in software engineering with professional experience at Raytheon and ID Tech.

## WORK EXPERIENCE

Research Assistant (under NSF AICaring grant)

**ARA & PIERS Labs (UMass Lowell)**

*June 2024 - Present*

- Designed, conducted and analyzed human-robot interaction studies.
- Developed an inference-enabled VUI integrating GPT4.o, ROS2, and autonomous task execution on the Hello Robot Stretch platform.
- Prepared and presented reports and presentations for academic conferences, research meetings, and instructional sessions.
- Published peer-reviewed papers/abstracts at following venues:
  - HRII workshop (ICRA 2025)
  - NERC 2024 & 2025
  - LBR Abstract (IROS 2026)

Software Engineer

**Raytheon**

*September 2023 - December 2023*

- Converted and modernized hardware drivers using C and C++.
- Used Git-based version-control workflows to develop, review, and integrate production software.
- Collaborated with multidisciplinary engineering teams to diagnose and resolve software & hardware integration issues.

Programming Instructor

**ID Tech**

*June 2021 - August 2022*

- Taught introductory programming and machine learning concepts to students across varying experience levels.
- Developed weekly curricula, assessed student progress, and provided individualized technical feedback.
